September 14, 2020

To Our Valued Customers and Partners:

On behalf of everyone at Senix, I wanted to express my sincere hope that everyone is staying safe and healthy. We are all going through unprecedented times due to the COVID-19 pandemic. It is our top priority to ensure the well-being of our employees, friends, and families as we all manage through this challenging situation.

Senix is continuing to follow both CDC and State of Vermont regulations and guidelines and remains open for business. We are in close contact with all our suppliers and have not seen and significant disruption in our supply chain, and we have continued to stock most of our sensors for quick delivery.

Through the remainder of 2020:

- We are cleaning our facility daily, and specific areas inside the building multiple times a day.
- All essential employees that need to enter our facility are tested for temperature and required to complete a short questionnaire.
- Visitors are not allowed in the facility. If there is a justification provided by a visitor, they are only allowed to enter the facility if they have followed the State of Vermont visitor guidelines, made an appointment in advance, and are temperature tested upon arrival.
- All Sales, Marketing, Engineering and Administrative employees are working remotely
- All our daily group meetings and customer interactions are done by teleconference

I am proud to say that Senix's reputation for exceptional technical customer service remains strong, and Senix is committed to continue to meet all our customer's needs. We will remain in frequent contact with our suppliers and continue to supply our standard and custom sensors and sensor systems.

Senix truly appreciates your understanding, and we are dedicated to supporting our customers' needs and providing the very best in customer support possible. We believe Senix's future is very bright and we are doing our very best to come out of this stronger than ever.

Sincerely,
